# HOLLAND

- (1) **T**he paper industry in Europe and in Holland is one of the results of wars. The Arabs who defeated a Chinese army near Samarkand in the middle of the 8th century, learnt the art of paper-making from their Chinese prisoners and gradually introduced it throughout their empire, until finally it reached Spain in the middle of the 12th century. The capture of Antwerp (which was a great paper centre in the 16th century) by the forces of Austria, drove its paper merchants north to Holland. The earliest mention of national paper-making in Holland was contained in a decree
- (2) signed by the Earl of Leicester in 1586 authorizing Hans van Aelst and Jan Luipart to manufacture paper near Dordrecht. At this time Holland
- (3) was invaded by Spain and Austria, and being unable to resist alone offered the sovereignty of the Netherlands to Queen Elizabeth, who did not accept, but sent a military force under the Earl of Leicester. He was appointed head of the state, and as such he signed state papers. When the armies of Louis XIV invaded Guelderland (1671) the paper mills of that province were transferred for greater safety to the Zaan district near Amsterdam. It was from here that a great paper industry came into being and became world famous. It will be seen therefore that wars — “the malady of princes” — have brought in their train blessings without which the printed word could not have reached the millions as it does to-day.

- The trade secret was so well kept by the Chinese, that the invention of paper making in Europe might have been delayed until the 18th century,
- (4) when two or three observers noticed that a paper-like substance was
- (5) formed by the action of wasps when making their nests, and that a paper-like film rises to the surface of stagnant waters.

According to Stoppelaar, the oldest paper found in the archives of Holland is dated 1346, and is preserved at The Hague. In his monograph  
(6) on old paper in Holland, he gives 271 reproductions of watermarks, nearly  
(7) all of which figure in Briquet's Dictionary of Watermarks. The watermarks show that the earliest paper came from Italy, France, Switzerland and Germany. The watermark of a windmill that appears on the cover of the monograph is of French origin.

At the beginning of the 17th century, Holland imported printing and writing paper from Germany, France, Switzerland and Genoa, because at that time no fine white paper was manufactured in the country. The chief distributing centres were Antwerp and Cologne, but as prices became too high, Dutch middlemen or factors went to France in the Angoumois district early in the 17th century and had paper made for the Dutch market. At first the paper bore well-known French or foreign marks, mostly described by Briquet, but later they bore Dutch marks with French countermarks. From this time on Amsterdam developed a world market for the distribution of paper. In 1635 the coat-of-arms of Amsterdam begins to appear as a watermark on paper. This seems to be the first Dutch watermark, but it was made in France alone, and we only know that the first maker's initials were "I. M." From this time onwards  
(8) paper with variations of the watermark of Amsterdam was made at first in numerous French mills and later in Dutch mills. A specimen has even been discovered that was made in Genoa.

Amsterdam began to export paper to England and elsewhere in the beginning of the 17th century. There were factors or buying agents for the  
(3) home product, and for the produce of Germany and France. In the early part of the 17th century German paper was imported through a "Company" called Lodewyk Coningh, Albert Jaso & Co. This Company supplied much paper with the following watermark:

The letters are the initials of Cornelis and Anna van Lockhorst, members of the Company. In 1634 the Company got into difficulties,

and from that date the import of German paper gradually ceased. French paper replaced it, especially for printing. Home and foreign paper was handled by factors established at Amsterdam, but French paper was handled by factors established in France, mainly in the province of Angoumois.

The success of Amsterdam as a world distributor of paper, including the produce of France, aroused French opposition. The French Government did its utmost to protect national industry and to place obstacles in the way of Dutch competition.

The Angoumois district, which was one of the most important producers of paper in France, came under the control of foreign capital, (6) mainly Dutch. Many of the master paper-makers and their workmen (9) were Protestants or Huguenots, and on the revocation of the Edict of Nantes (1685) when non-Catholics were persecuted and expelled from France, many of them emigrated to England and Holland. The Dutch factors who had been established in France for upwards of half a century were obliged to withdraw, as they were not Catholics. The blow intended for the Dutch recoiled on the French industry and benefited that of Holland, where the industry became concentrated from this time on, and moreover was reinforced by the addition of skilled immigrants from France. Until 1685 the Dutch were mainly paper merchants, but henceforward they became manufacturers as well, and even supplied France and Italy — their former sources — with the finest paper obtainable.

Although the highest standard of quality was reached in Holland during the 18th century and an increasing demand for Dutch paper arose in various countries of Europe and the Levant, the majority of books published in Holland during this period were printed on French paper. At this (10) time Amsterdam was one of the principal printing centres of the world. In a collection of 1000 printed placards or official notices, measuring about 20" × 17", for the period from 1618 to 1797, the foreign and Dutch sheets amount to only 36, all the rest being French, which shows a marked preference for French printing paper.

(11) A curious illustration of this preference may be noticed in a work published by Messrs A. Blussé & Zoon of Dordrecht, when they wished to include in their series of technological text books, a work describing the manufacture of paper. The writer, named Kasteleyn of Amsterdam,

instead of producing an original Dutch work, which he might have done, gave a translation of the French manual by De Lalande. It was printed on French paper and published by Messrs. Blussé in 1792 and dedicated by them to Messrs. Blauw & Briel, renowned paper-makers of Wormerveer with whom they had enjoyed friendly and commercial relations for many years.

- This preference for French paper confirms the opinion of the late Mr. J. W. Enschedé, an authority on paper and printing, who asserted that Holland never excelled in the manufacture of printing paper, and that the best product was used for writing. On the other hand it must be admitted that Dutch paper has been successfully used in various countries for printed works, and excellent maps and atlases have been engraved on
- (12) Dutch paper. One must turn to France for evidence of Dutch superiority. Towards the middle of the 18th century, the Inspector of Manufactures in France recommended Vimal of Auvergne (his watermark was a pig, being an
- (13) allusion to his name) as one of those best qualified to maintain the superiority of his produce, if he would only transform his plant in accordance with the Dutch process. Merchants had such a high opinion of him that they begged him to imitate Dutch paper, with the same laid lines and watermarks as made in Holland, so that the public who were prejudiced against the native article should no longer refuse it. In describing the Dutch industry in 1762 De Lalande said that “although Dutch paper is finer than French, it lacks the finish of the latter. Dutch paper has a finer, smoother and more transparent appearance than ours. This is due to the uniform fineness of their linen rags, which are carefully selected and not mixed. Dutch paper is thicker and better prepared than ours, because their moulds are deeper, and because pulping by Dutch cylinders is superior to that by stampers. Moreover, Dutch workmen work with more care and deliberation than our workmen are accustomed to. The wealth of their paper-makers, the thrift of their inhabitants and the power of their finances combine to make their mills more efficient than ours. What has been said, however, concerning the properties of Dutch paper applies only to the superfine qualities, such as: large horn, Pro Patria and the arms of England and Venice. There are many sorts that are inferior to our paper of Auvergne, such as: the double fine crown and double
- (14) fine “écu” (arms of France) made at Thiers, Ambert and Annonay”.

(15) The Almanac of Troyes for the year 1776 publishes the following advertisement: "Sieur Bouvet established a very fine paper factory a few years ago at Estissac, a village situated four leagues from Troyes, where he manufactures superfine white and blue papers in the Dutch style." La Rochefoucauld's crest became Bouvet's watermark.

Mr. J. G. Honig of Koog aan de Zaan has a collection of old paper wrappers, one of which bears the following wording: "Papier fin fait par Jacques Corneille Miel au Moulin de la Ruche à Miel." J. C. Miel is no other than Jacob Cornelisz Honig, and the "moulin" was the celebrated Golden Beehive at Zaandyk. The French wording was probably intended for paper exported to France.

For a long time fine printing in France was made on "papier de Hollande", but it is known that much of this product was made in France to satisfy the prejudice of persons who admire anything that is foreign. It is possible that the designation "papier de Hollande" originated from the fact that superfine paper was manufactured long ago in Angoumois with Dutch watermarks for the Dutch market.

The first important mill in Holland was erected in 1665 by Pieter van der Ley at Zaandyk, and his watermarks are to be seen frequently in prints and MS. in Holland and England. The firm, which lasted over one hundred years, was followed by a number of other celebrated mills such as those of the Honighs, van Gerrevinks, Villedary, Blauw & Briel, Kool, Rogge, Pannekoek, and Cramer & Co. In the watermarks in paper made by these firms one has clear evidence that much of their produce was made expressly for the British market. These watermarks include Dutch marks in conjunction with the royal monograms of William III, Anne, and the Georges; they include also the Britannia mark, and the coat-of-arms of England and London together with the names of Dutch mills, in addition to those of English merchants and even paper-makers, such as Whatman and Portal.

(6) Until 1670 Dutch paper had not the strength of French paper. The first to equal French paper was made by Pieter van der Ley about 1675. At the end of the 17th century there were sixty mills in the Zaan district and 115 in the Veluwe. Peter the Great visited two paper mills on the Zaan named "De Kok" and "De Walvisch", and had a mill constructed in Russia on the Dutch model. In the 18th century Holland imported French

(6) printing paper from Bordeaux, La Rochelle, St. Malo and Morlaix.

The accompanying illustration depicts the stone carving representing the interior of a paper mill, that was fixed to the house built in 1649 for Pieter de Haak, paper merchant of Amsterdam. The house was pulled down in 1908, and the carving is now in the Academy of Fine Arts in Amsterdam. This is the oldest representation of a Dutch paper mill. The wheel in this carving is a water wheel, and therefore represents a Veluwe mill, because in this district mills were driven by water power,

(16) whereas in the Zaan district they were driven by wind.

The lower picture represents a wood carving over the door of the house of the former owners of the Golden Beehive mill, one of whose  
(17) watermarks was a beehive. This mark has been imitated very much in  
(18) other countries, particularly in Germany. The picture was taken from a work by Mr. Gerrit Jan Honig, a descendant of the famous paper-makers of that name.

A Dutch Ordinance of 1636 mentions the following  
sorts of paper :

		<i>Duty per ream</i>	
Lombardy vellum		Gulden 30	
Royal and Elephant	(German)	15	
Post	”	10	
FFF	”	} 7	
Strasburg Lily WR	”		
Cardinal			
Flower			
Toren-yser (Thurneysen)	Swiss		
Two Bears	”		
I. D.			
Middelhuys (Heusler)	”		
(16) Small Lily			5
Crozier of Basel			} 4
C/O/A of Saxony			
Dolphin			
Eagle		4	
Cardoes (Cartridge)	French	10	
Pot	”	3	

Chronological list of watermarks:

- 1629 P. Düring
- ” Lion and man
- ” Toradel (Tower on breast of eagle)
- 1633 Flower (German)
- 1636 Strasburg Lily
- ” FFF
- ” Arms of Cardinal
- ” 't Huys H. Crans (Heusler)
- ” Toren-yser (Thurneysen)
- ” P. P.
- ” Two Bears

CHRONOLOGICAL LIST OF WATERMARKS, CONTINUED

- (16) 1636 Bartels flower
- „ I. D.
- „ W. R. (Wendelin Riehel)
- „ Crozier of Basel
- „ Saxon shield
- „ Dolphin
- „ Elephant
- „ Pot
- 1643 Horn
- „ Snake
- „ Foolscap
- „ Gros bon Cardinal
- 1648 “à la serviette”
- 1666 Post paper (Italian)
- 1670 Amsterdam C/o/a V. G. (Van Gangelt)
- „ Foolscap G. B.
- 1664 Post rider or Postilion

## DUTCH PAPER-MAKERS

<i>Date of MSS., Prints or Decrees.</i>		<i>Locality of mills</i>
1740	Aalders, Jacobus	Groningen
1628/32	Aelst, Andries van	near Arnhem
1592	Aelst, Frans van	near Arnhem
1628/32	Aelst, Frans van	
1618	Aelst, Gerrit van	Eerbeek mill
1586	Aelst, Hans van	near Dordrecht, first mill in Holland
1592	Aelst, Jan van	Veluwe
1628	Aelst, Liefke van	Veluwe
1628	Aelst, Lyntje van	Veluwe
1623	Aelst, Lodewyk van	Apeldoorn
1654	Aelst, Lodewyk van	Beekbergen
1602	Alleman, Hans	Overveen
1827	Ameshoff, J. H.	
1632	Arendz, Hendrik	Zaandam
1734—1800	Backer, Pieter Roelofz.	Zaandyk, Zemelzak mill
1835	Benthem, S. van	
1777—82	Berends, J.	
1724—1825	Blauw & Briel	Wormerveer & Zaandyk
1733—1827	Blauw, Dirk — & Co.	Oude Blauw mill
1822	Blauw, De Erven D.	
1586	Bois, Jan Jacobz. du	Alkmaar
to 1841	Breet, Jacob & Klaas	Zaandyk
1813	Brouwer, G. & I. — & Co.	
1740	Brouwer, Gerrit	Veluwe
1810	Brouwer, H. — & Co.	
1808—40	Brouwer, P.	
1839	Charro, H. F. de — & Zn.	The Hague
1616	Cornelisz, Jacob	Zaandyk, De Kauwer mill
1711	Cramer, Bernardus	Ootmarsum, now Berghuizer Papierfabriek at Hattem

DUTCH PAPER-MAKERS, CONTINUED

1734—1796	Cramer, Symon Delden, D. van	Zaandyk, De Visser mill Rosendaal
1839	Delden, D. van	Loenen
1669	Dell, Nicolaes	Amsterdam
1721	Dercks, J. Desjardyn	
1604	Deyman, Ysbrandt Durandaus, J.	Amsterdam
1740	Engelse, Michiel	Zaandyk, De Hoop mill
1734	Engelse, Gerrit Feuilletau de Bruyn & Co.	Zaandyk, De Gans mill
1790	Forsten & Co.	
1607	Fredericksz	Amsterdam
1803	Gelder, van — Schouten & Co.	Wormer
1855	Gelder, van — Zonen	Wormer
1601	Gent, Adriaen Lievensz van	
1690—1819	Gerrevink, Lubertus van	Egmond a/d Hoef, Phoenix mill
1730	Gerrevink, Lucas van	Alkmaar, Phoenix mill
1733	Gerrevink, Abram & Isaac	Egmond a/d Hoef
1596	Gillis, Gregorie Goey or Goei, H. D.	Middelburg
1775—94	Goey or Goei, M. de	
1609	Hackforth, Gerard	Barneveld
1794	Hendricks & Zoon	
1653	Hendricksen, Cornelis	Loenen
1621	Hendriksz, Hendrik	Amsterdam
1603	Hendriksz, Jan	Amsterdam
1787	Hessels, J.	
1845	Hesselink, A. & I.	
1810	Hesselink, Gerrit	
1685	Heses, Sons of J. T.	Schoorl
1823	Heyden, van — & Co.	
1758?	Hissink, W.	

DUTCH PAPER-MAKERS, CONTINUED

1609	Hoeve, Pieter v/d	Alkmaar
1683—1856	Honig, Cornelis & Jacob	Zaandyk, Herderskind mill
1734	Honig, Cornelis Adriaan	Zaandyk
1675—1902	Honig, Cornelis A. & Jan	Zaandyk, De Vergoldene Bykorf mill
1680	Honig, Jan Adriaan & Cor- nelis	
	Honig & Co.	
to 1894	Honig, Jan — & Co.	Last owners of J. v/d Ley's mill Fortuyn at Zaandyk
1702	Honig, G. — & Zoon	Zaandyk
1737—87	Honig, Jan — & Zoon	Zaandyk
	Houtum, Joh. van	Arnhem & Apeldoorn
1770	Hoysing, H. C.	
1774	Hummen, I.	Veluwe
XVII C	Jacobsz, Jan	Alkmaar
1601	Jacobsz, Willem	Alkmaar, De Dikke Guurt mill
1603	Jansz, Hendrik	Amsterdam
1617	Jansz, Jacob	
1605	Jansz, Jan	Amsterdam
1613	Jansz, Jan	Ugchelen, near Apeldoorn
1740	Jong, Jan de	Zaanland
1792	Jonker, W. A.	
1796	Kamphuysen, H.	Molecaten
1605	Keyns, Rens Dirksz. v/d	Schagen
1740	Kelder, Cornelis Jansz	Zaanland
1813	Kempen, v. — & Co.	
1791—1813	Kloppenburg	
1791—1810	Kloppenburg, J.	
1808	Koldewyn, H.	
	Koning & Desjardyn	
1728—1800	Kool, Jan	

DUTCH PAPER-MAKERS, CONTINUED

1821	Kool, I. — & Co.	
1788	Korff & De Vries	
1771	Kouwenhoven	
to 1796	Kouwenhoven, Adriaan & Jan	Zaandyk
1711	Kremer, see Cramer	
	Krantz de Charro & Co.	
to 1788	Lakeman, Jan	Zaandyk
	Ledeboer, I. H.	Velp
1601	Lenaerts, Adriaan	Amsterdam
1703—1894	Ley, Jan v/d	Zaandyk, Fortuyn mill
1740	Ley, Jan, Claes & Aris v/d	Zaandyk, Fortuyn mill
1665—1765	Ley, Pieter v/d	Wormerveer, Wever mill
1698—1815	Ley, van der	
1832	Lier, M. v. — & Zoon	The Hague
1586	Luipaert, Jan	
1799	Meyrink, C. I.	
1807	Middelink, I. T.	
XVIII C	Mos, Jan	
XVII C	Nanning, Albrecht	Dordrecht
1795	Neerdorp

1777	Pannekoek, G.	
1848	Pannekoek, G. J. W.	

DUTCH PAPER-MAKERS, CONTINUED

1717	Pannekoek, Klaas, or Nicolaas	Heelsum
1772	Pannekoek, W. & C.	
1808	Pannekoek, W. W. & H. Pasman, B. H.	
1610/25	Pieterz, Gerrit	P. v/d Ley made paper with letters "G. P." in 1673
1628	Poel, Pieter & Abr. v/d	
1808	Printz, Joh.	
1841	Proost, I.	
1751	Raket, Hendrik	Zaandyk
1796	Reyers, Z.	
1605	Rinnegum, Jan Jansz Roelofs, G.	Alkmaar
1704—1803	Rogge, Adriaan	Zaandam
1808	Sande, W. G. v/d Sanders, T. — & Zoon	Apeldoorn
1739—1830	Schoen, Hendrik	Zaandyk, De Herderin mill
1707—43	Schoen, W. H.	
1783—1803	Schouten, Marten van — & Co.	Wormer
1598	Schuren, Jan van	Hattem
1740	Schut, D. I.	Veluwe
1863	Schut, I. K.	
1745	Sebelle, D. — & Wend	
1745	Sebelle, Ketel & Wassenbergh	
1740	Verburg, A.	Groningen
1758	Villedary, Jean	Hattem
1721—47	Vierrevant, Jeers	
1720	Vorsten, N.	Loenen, Veluwe
1790	Vorster, H.	
1796	Vos, A. Vos & Knoops	

DUTCH PAPER-MAKERS, CONTINUED

1799	Vries, Pieter de — & Comp.	
1779	Wassenbergh	
1840	Wassenbergh & Co.	
	Wend, H. C.	
1790	Wend, H. C. — & Zonen	
1790	Wend & Zonen	
1734—1841	Wessanen, Cornelis Adriaan	Zaandyk
1621	Willemsz, Hendrik	
1739	Wolbrink, Egbert	Schoorl, Roode Hert mill
	Wysmuller, Erve	Amsterdam, still exists

In addition to these names a list compiled in 1740 of about 150 paper-makers of Zaandyk, Egmond, Groningen and the province of Guelderland was published by Mr. G. J. Honig of Koog a/d Zaan in the *Nederlandsche Familieblad* in 1888, p. 247 et seq.

# FRENCH PAPER-MAKERS WHO WORKED FOR THE DUTCH MARKET

<i>Date of MSS., Prints or Not. Acts</i>		<i>Locality</i>
1754—69	Ballande, P.	Agenois
1769	Ballande Cadet	
1744	Barre, Jean	Périgord
1651—62	Bernard, Pierre	Beauvais, Angoumois
1736	Bruin, B.	Angoumois
1749	Brun, Bernard	Angoumois
1661	Chatonet, François	Charente, Rieff mill
1788	Dablan, V.	Angoumois, La Couronne mill
1653	Dalidet, Giles	
1679—1700	Declide, F.	Angoumois, La Courrade mill
1778	Degau, A.	
1603	Demarcillac, F.	Angoumois, Pont des Tables mill
1654—79	Dexmier, P.	Angoumois, La Pallurie mill
XVIII C	Dexmier, Veuve — & F. Declide	Angoumois, La Courrade mill
1747	Dort, J.	
1781	Dumas, A.	
1739—89	Dumas, François	Périgord
1789	Dumas, I. Aîné	
1777	Fouant, M.	Limousin
1766	Frivard	Limousin
1648	Galtier, Pierre	Angoumois, Beauvais mill
1690—1704	Gallet, Georges	
1785	Geofre, I.	
1643—83	George, Claude de	Angoumois, Nersac mill

FRENCH PAPER-MAKERS ETC., CONTINUED

1758	Gerlou, I.	
1752	Graterole, P.	Limousin
1656—1793	Jardel, Daniel	Périgord, Couze mill
1701—39	Jardel, Francois	Périgord, Couze mill
1687—1772	Jardel, Jean	Dordogne, Creyse mill
1701—42	Jardel Jr., Jean	Périgord, Couze mill
1706—84	Jardel, Raimond	Périgord, De la Poque mill
1669—99	Joly, Antoine	Angoumois, Nersac mill
1699—1715	Joly, Pierre	
	Juilhard, Daniel	Périgord, Fougère mill
	Latache	see André de la Tache
1736	Marchaix	
1739	Marot, F.	Périgord, Couze mill
1759	Marot, P.	
1782	Marot, R.	
1730	Martin	
1748	Nadel, D.	Périgord
1747	Nadal, G.	
1720—83	Perie, D.	Périgord
	Planteau, Estienne	Périgord, Casteljaloux mill
1753	Potuis	Agenois
1778	Prat, P.	
1690	Riflaud, Pierre	Angoumois, La Couronne mill
1788	Rivière, P.	
1684	Rondel	
1638—61	Roulet, Jean	Angoumois, Le Got & L'Abbaye mills
1632	Rousselot, Jean	Angoumois, Pont de Ruelle mill
1650	Sailhan, J.	Périgord, Clausureau mill
1723—50	Tache, Claude André de la	Angoumois, Ruelle mill

FRENCH PAPER-MAKERS ETC., CONTINUED

1710	Tarnaud, P.	Angoumois, L'Abbaye mill
1765	Tobias, P.	Angoumois
1773	Tomas, P.	Angoumois
1665	Touzeau, Estienne	Angoumois, St. Michel mill
1706—57	Valet, P.	Périgord
1668—1758	Villedary, Jean	Angoumois, Vraichamp, Beauvais and La Couronne mills
1758—1812	Villedary, Jean	Guelderland, Hattem,
1669	Vincent, Isbram	Angoumois, Chantoiseau mill
1781	Vine, D.	

In addition to the above names, about 150 other French paper-makers made paper for the Dutch market, mainly during the 17th century, using various Dutch watermarks and the makers' initials as a countermark.

The name of D. Jardel appears on paper during a period of 137 years, there having been several generations of the same name.

From the records of a law suit between two factors named Abram Janssen and Jacques Salmon, who had both employed Claude de George to make paper for them, it became known that the latter died in 1683, and that paper with his initials, C. D. G., was made after his death. The explanation was that paper with these initials had a great reputation for excellence, and that the widow of C. de George continued to work his mill and to produce equally good paper with the same watermark. Paper with these initials may be found dated as late as 1706.

The name or initials of Jean Villedary as watermarks cover a period of 150 years. The first French paper-maker of this name made paper for four Dutch factors, viz. Abram Janssen, François van Tongeren, Pierre van Tongeren and Gilis van Hoven. The initials IV, of Jean Villedary, appear on a great deal of paper for books and MSS. in the public archives and libraries of England and Holland. They appear also in conjunction

with the names and watermarks of Lubertus van Gerrevink, C. & I. Honig, Adriaan Rogge and Van der Ley. The initials IV and L.V. G. together have been found on paper dated from 1736 to 1812. It is not known whether Villedary worked in conjunction with the other Dutch paper-makers, or whether they made use of his initials, which had become a hall-mark of excellence.

## FLEMISH AND DUTCH FACTORS OR AGENTS IN FRANCE.

According to notarial acts at Angoulême one can trace, in 1628, the presence there of Girard Verduyn, a Flemish merchant of the city of Amsterdam. He came to buy paper on his own account and for that of Jean Petittau, his partner in Amsterdam. One finds also Laurent van Ravestein of Leyden, and the following established in the faubourg l'Homeau: Abraham Vannezel, Van der Platen (1650), Van Gangel, Dericq, Jacob and Abraham Janssen. Most of them were domiciled at Angoulême, and became owners of mills. Van Tongeren acquired the Cothier mill in 1721. This is probably Pierre van Tongeren who in 1739 (19) was described as a banker and owner of paper mills at Cothier.

In a paper mill there were three or four categories of people: (a) the owner of the mill, (b) the master paper-maker, (c) the workmen, who number from 30 to 40 persons in a mill with two vats, (d) the middleman or factor, who came between the owner and the paper maker. This individual furnished the funds.

The factor was usually one of those wealthy Flemish and Dutch merchants mentioned above. Although owners of mills they were not manufacturers, but employed master paper-makers to work for them. The function of the factor was to advance the necessary working capital required by the paper-makers; this amounted on an average to 1000 crowns per (19) vat, and was called the "cabal".

## LIST OF DUTCH FACTORS OR AGENTS IN FRANCE AND HOLLAND.

1635	Anthony, Nicolaas	}	{ Amsterdam agents for the home
1635—53	Bartels, Albert		

LIST OF DUTCH FACTORS OR AGENTS ETC., CONTINUED

1661	Beeck, Pieter Joosten	Bought 20,600 reams of paper from Pierre Galtier of Beauvais, Angoumois, between 1661 and 1663
1635	Beyerland, Willem van	Amsterdam agent for home produce
1635	Blauw, Dr. Johan	Amsterdam agent for home produce, also publisher in Amsterdam
1635	Cabillau, Jonas	Rotterdam
1635	Colom, Jacob Aertsz	Amsterdam agent for home produce
1685	Domma, Pieter	Amsterdam, advertised the sale of Italian paper
1644	Gangel, Christophe van	Supplied paper to P. de Haak from La Couronne mill
1639	Haak, Pieter de	In 1666 the Exchange Bank of Amsterdam had an item for his account for fl. 600,000
1640	Haes, Cornelis & Antonie	Father and son, merchants of Amsterdam. In 1643 they imported from Bordeaux: fools-cap, post-horn, cardinal & serpent marked paper
1634	Hoven, Gillis van	In partnership with P. de Haak. Factor in France, several mills worked for him in Angoumois.
1635	Holyen, Rombert van	Amsterdam agent for home produce
1593	Jacobsz, Laurens	Amsterdam agent for Lombardy paper
1635—1710	Janssen, Abraham	Factor at Angoulême, Puy-moyen mill
1638—73	Janssen, Dirk	Brother of A. Janssen. Owner of

1633	Walschaert, H.	Amsterdam importer of German paper
1648	Wit, Frederick	Amsterdam paper dealer and engraver. Engraved the ornaments of the Town Hall at Amsterdam in 1665

## NOTES ON SOME OF THE LEADING DUTCH FACTORS IN FRANCE

In 1635 a number of Dutch factors established themselves at Angoulême, and among them was Abraham Janssen. He owned mills at Puy-moyen and at Nersac, and employed the following paper-makers: Jean Villedary, Claude de George, Jean and François Jardel, P. Salée, Etienne Touzeau and others. Being a man of substance he soon acquired considerable influence, and was appointed "Intendant des Finances de la Généralité de Limoges". In those days people in trade were not allowed to use crests, but gradually a few exceptions were made for eminently successful manufacturers, and Janssen obtained permission to add a crown to his foolscap watermark.

Dirk Janssen, a brother of Abraham Janssen, is described in local notarial acts as a factor at Angoulême and the owner of various mills between 1638 and 1673. There were probably two men of the same name, because in a church at Egmond a/d Hoef there is a tombstone with the inscription: — "Here lies the paper-maker Dirk Janssen who was laid to rest Nov. 25, 1667". (In Dutch).

Jacques Salmon described as "Escuyer, Seigneur des Moulins, Conseiller du Roy, Lieutenant de la Maréchaussée d'Angoulesme", owned a mill at Nersac and employed Claude de George, paper-maker, until his death in 1683. In 1686 Salmon endeavoured by recourse to law to restrain Abraham Janssen from imitating his watermark which partly consisted of the letters C D G the initials of the famous Claude de George. Evidence was furnished showing that Abraham Janssen had injured the plaintiff in the manner complained of, but the lawsuit does not seem to have been concluded. Salmon did not obtain any redress and Janssen continued to supply paper with the watermark C D G long after the death of Claude de George. The paper, however, was of excellent quality and not inferior to that made during the lifetime of Claude de George.

The above picture is a reduced facsimile of a paper-wrapper in a collection of wrappers in the Municipal Archives at Amsterdam, and it is believed that the portrait, in cap and bells, is that of Abraham Janssen. The full names of the master paper-maker IM have not been discovered, but tracings of his watermarks — a foolscap and the arms of Amsterdam — appear in this work. In addition to Janssen's various watermarks his initials AI or AG always appear beneath the main watermark.

## DURATION OF SOME OF THE CHIEF DUTCH WATERMARKS

	<i>Traced from MSS. or Prints</i>
Arms of Amsterdam	1635—1796
“VRYHEYT” in Wreath, Lion, spear and seven darts	1654—1720
“VRYHEYT” in crowned circle “Pro Patria ejusque Libertate”	1704—1810
Arms of the Seven Provinces, Lion, sword and seven darts in crowned shield	1656—1800
The same, “Eendraght maakt maght”	1667—1800
“Tuin”, Garden of Holland, or Maid of Dort (Dordrecht) “PRO PATRIA”	1683—1799
Arms of Orange Nassau	1616—1767
Dutch Royal Rider	1762—1796
Dutch Royal Heads	1815—1840
Anglo-Dutch arms	1697—1741
The Beehive of Messrs. Honig	1683—1807
Arms of England	1733
Arms of London	1694
Britannia	1650
British Royal Monograms	1687—1775

## IMITATION OF DUTCH WATERMARKS

The imitation of Dutch paper and watermarks by the French during the 18th century has been mentioned above. There was some excuse for this because the industry had fallen into decay, and the Dutch being the leading paper-makers and distributors, it was found necessary to follow their methods of manufacture. The same reason did not exist for German mills, which had been established far longer than those of Holland. (19) Nevertheless those of Württemberg and Bavaria imitated Dutch paper (17) and the trade marks of one of the leading firms. Specimens of imitated watermarks and descriptions of them are given here: —

The Kautenbacher Paper Mill in Bavaria was owned by the paper-makers Adolf, Louis and Richard Böcking.

This mill prided itself on its paper, which was used specially for official purposes. This paper had as watermark the coat-of-arms which

R | B | & | C

was copied from specimens of "Pro Patria" from the Dutch paper mill "At the sign of the Golden Beehive" at Zaandyk". The pleasure which the enterprise gave to the brothers Böcking is borne out by a correspondence with the Zweibrüchen Revenue Office dated 18 March, 1790, which

PROPATRIA

W

A

I

L

states that the coat-of-arms paper quoted at 4 gulden a ream was in great demand and used considerably more than the Dutch sorts of paper from the Golden Beehive quoted at 7 gulden a ream.

*Gransholm*

The mark shown on the opposite page of Johan Lorch of Wachtelsmühle in Bavaria, and the following is a description of the mark: —  
 (17) “Hollandiadarstellung, überhöht von Pro Patria-Devise und einem Vogel (Wachtel) als redendes Wappen der Wachtelsmühle im ersten Bogenblatt, die Buchstaben W A J L als Herstellermarke im zweiten Bogenblatt des 1798 beschriebenen Bogens”.

A Swedish imitation is also given here. The Gransholm Paper Mill

was founded at Gransholm in the South of Sweden in 1790. Each mark was in the centre of each half sheet.

## VAN DER LEY

The above Pro Patria mark with the name Van der Ley is an imitation that was found on paper in Sweden. It shows several departures from the conventional design, and the printing is defective.

The following imitated mark was found also in Sweden. The countermark was also VAN DER LEY: —

The following is a tracing of a mark made in Genoa. The initials are those of Giacomo Gambino, and the leg in a corner of the sheet is his personal mark in allusion to his surname: —

# LIST OF REAM WRAPPERS OF PAPER

1774	I. Hummen	Vryheyt	
1668		Windmill, and beneath the legend: "D. Pap! Moole"	

"Papier fait par Jacques Corneille Miel au moulin de la Ruche à Miel". This appears to be Jacob Cornelis Honig's little joke.

There are many more wrappers in this collection.

## ENGLAND

**T**he first European paper that was used in England came from Italy and France from the early 14th century until the end of the 16th century. During this period there were two English mills: that of John Tate at Stevenage in Herts 1494—98, and that of John Spielman at Dartford in Kent 1588--1605. Wynkyn de Worde printed on Tate's paper in the production of Bartholomaeus' "De Proprietatibus Rerum" and Caxton's translation of the "Legende Aurea" of Jacobus de Voragine. A rare, and perhaps unique combination consists of Caxton's Printer's device and Tate's (21) watermark on the same sheet. This curiosity is treasured in the office of the Paper Makers' Association of Great Britain. The following is an eye-copy of it:

Swiss and German paper made its appearance in England during the latter part of the 16th century. At the beginning of the 17th century paper in use in England came from France, Switzerland, Germany and Italy. French paper came from Amsterdam, but mainly from Bordeaux and La Rochelle, and that from Switzerland and Germany from Amsterdam. Dutch paper began to enter England in appreciable quantities in the last (22) quarter of the 17th century. Until then French, Italian and Swiss paper continued to be imported, but during the 18th century most of the imports came from Holland, and were of Dutch manufacture. Several attempts were made to manufacture paper in England up to the beginning of the 18th century, but the mills were of short duration and unable to supply the national demand.

Fine white paper began to be made in this country on a fairly large scale in the second half of the 18th century, when James Whatman established (22/3) his famous mill at Maidstone. For a considerable time Whatman papers were made at two mills, at one in Kent and at another in Holland. The produce of one mill was distinguished by the watermark "J. Whatman, Turkey Mill", and the other "J. Whatman" accompanied by the initials L V G, the initials of L. van Gerrevink of Egmond a/d Hoef in North Holland. At this time Holland excelled in the art of papermaking, and it (23) is in that country that Whatman learnt the art. One may infer that he acquired his knowledge in the mill of Lubertus van Gerrevink, a celebrated manufacturer. Enquiries have been made in Holland in an endeavour to confirm this assumption, but without success. There have been many paper-makers of the same name in various parts of Holland, which increases the difficulty in tracing a particular one. There were two paper-makers with the same initials, at the same time and both in North Holland, whose mills were both named the Phoenix. It was probably for this reason that Lubertus van Gerrevink, the owner of the Egmond mill, had his initials registered as a trade-mark in 1726, to distinguish his paper from that made by Lucas van Gerrevink.

An even older established firm than that of J. Whatman is the firm of the Portals of Laverstoke mill in Hampshire. The Portals were Huguenots who fled from France during the persecutions that followed the revocation of the Edict of Nantes. Henry Portal, one of the survivors of the family who succeeded in escaping, came to England and was employed

in a mill belonging to the Governor and Company of White Papermakers in England. In 1718 he acquired the Laverstoke mill, which the family has maintained to this day. Henry Portal died in 1747 and was succeeded by his son Joseph Portal, who managed the mill until his death in 1793, and his son John Portal continued the business until his death in 1848. The firm have been sole makers of bank-note paper for the Bank of (24) England since 1725.

Watermark No. 414 bears the name of J. Portal and the initials of Lubertus van Gerrevink. Watermark No. 413 bears the name of J. Bates and the same initials. With the firm of Whatman this makes three English firms connected with the same Dutch mill. Messrs. Portal were asked whether they could explain the connection between their firm and that of Gerrevink in the past, but they were unable to throw any light on the subject.

Besides the firms named above, the following names appear in watermarks on paper up to 1764: —

Elliston and Basket 1693; Heath 1743; Crowder 1745; Wickwar 1754; Curteis and Son 1763; Durham 1763; J. Nind 1764. These appear to be merchants or manufacturers with works abroad.

“The World’s Paper Trade Review” of May 5, 1922 contains interesting information concerning old paper mills and hereditary owners. It is based on a humble 18 page pamphlet  $4\frac{1}{4}$ " by  $2\frac{3}{4}$ ", and is a great contrast to the bulky papermakers’ directories of the present day. This old directory is dated 1853 and belongs to the Paper Makers’ Association in London.

Information concerning the industry in the 18th century is exceedingly scanty, because the archives belonging to the trade were destroyed by fire and cannot be replaced.

John Bagford, who lived between 1665 and 1715, collected a mass of material which he intended to incorporate in a work on Printing and Papermaking, but he did not live long enough to achieve his object. The material is in the British Museum among the Harleian MSS. numbered 5891—6988.

In 1690 the Paper Sellers appealed to Parliament to oppose the passage of a law to encourage the making of white paper in England on the ground that it would be a monopoly, that the makers could not supply

the English market, and that many people who live by the foreign paper industry, and the publishing trade, would lose their livelihood. The Governor and Company of White Papermakers stated that the Sellers were defending the interests of France, and that the English manufacturers were brown paper makers.

(25)

Until 1690 England paid £ 100,000 annually for paper to France and Holland.

(26)

The Paper Sellers, who were monopolists, opposed the manufacture of white paper in England also because other sellers would buy from the national factories and not from the wholesale importers, whose trade accordingly would be seriously diminished. The monopolists were thus advocating Free Trade rather than Protection.

(25)

There were at the time seven monopolizing Paper Sellers in England. The Stationers joined in appealing to Parliament to obstruct the bill. At this juncture the French Ambassador intervened in support of the importers of French paper.

(25)

The word "COMPANY" has been found frequently as a watermark on paper imported into England. The word may be intended for the East India Company, but more probably for the Company of White Papermakers mentioned above. The word being enclosed in a cartouche gives it the appearance of being a French watermark.

## FOOLSCAP

In the beginning of the 17th C. writing paper was usually 12—13 inches in height and about 16 inches in width, folded in two, each half sheet measured about 12 by 8 inches. A common watermark on the paper was a jester in cap and bells. This was also the mark of John Spielman who began papermaking in 1588. The first edition of Shakespeare's plays printed by Isaac Jaggard and Ed. Blount in 1623 was said to have been printed on paper with this mark. The successors of this firm stated that the paper for Shakespeare's folios was imported from Holland. At that time the Dutch had not started the manufacture of fine white paper, but they traded in French, German and Swiss paper.

As usual when a monarchy is succeeded by a republic, royal emblems are destroyed or removed, and it is said that Cromwell ordered the royal

arms watermark on official paper to be replaced by the figure of a fool in cap and bells. Careful search has been made in British archives in order to verify the allegation, but the specimens containing such a mark that have been found are extremely rare and of French origin. The mark was in existence one hundred years before the Commonwealth. On the other hand, several watermarks of hats have been found in various archives, and the shapes bore a strong resemblance to Puritans' hats. A specimen is given in Samuel Denne's observations on paper marks published in *Archaeologia* Vol. XII 1796. Referring to it he says: "A sheet for the year 1649 has for a device a large hat, and if an allusion to the fashion of the time was intended, it would denote the broad-brimmed beaver worn by the Puritans and republicans of that age." The mark lasted about thirty years.

The watermark was sought for as a guarantee of quality, and particular sizes of paper became known from their watermarks, such as Crown, Hand, Pot, Post, etc. Writing paper of the size given above became known in England as foolscap, and continues to bear that name. The foolscap watermark is no longer seen but has been replaced by Britannia or the Dutch lion. The only explanation why a Dutch watermark should appear on English paper is that the Dutch excelled in the manufacture of paper during the 18th Century and used their national emblem as a watermark. Much of this paper came to England, and English manufacturers had to imitate it in every detail when they determined to compete with Dutch manufacturers; they are so conservative that they are still making use of the Dutch lion on foolscap paper.

Although foolscap has meant a certain size of paper in England, it has not the same meaning on the Continent, where the mark is often found on writing paper, but has been found also on printing paper used by cartographers for engraving maps. W. Blaeu's maps of the 17th century were occasionally engraved on paper measuring 20" by 23" bearing a foolscap watermark.

## BRITANNIA

One of the marks used to distinguish English foolscap size of paper is the Britannia watermark. It seems incredible that we had to go to Holland for our Britannia watermark, but it seems that this was the case. The British

watermark appears to have been evolved from one of the Pro Patria watermarks representing the maid of Holland, seated within a palisade and holding a hat on the point of a spear (watermarks Nos. 127—153). The explanation of this picture is that Holland, surrounded by her fortified frontiers, maintains liberty by force of arms. The Pro Patria motto in the Britannia watermark No. 224 dated 1765 is manifestly Dutch. The English modification of this motto was "Pro Rege et Patria". The motto in the Britannia watermark No. 222 is decidedly foreign in its orthography.

### POST PAPER

In England "post paper" is understood to mean a certain size, but on the Continent it meant formerly paper with the post horn watermark.

The horn watermark has lasted all down the centuries from the early part of the 14th century.

An early mention of post paper is contained in a Dutch Ordinance of 1636, which describes various sorts of paper and includes their origin and the duty per ream. In this Ordinance post paper is put down as of German origin.

In 1643 Cornelis de Haes, paper merchant of Amsterdam, imported paper from Bordeaux with the "Post-horn" watermark.

Bagford's collection of paper at the British Museum contains a wrapper of paper supplied by Paulus Sebelle, paper merchant of Amsterdam, whose watermarks were a horn in a shield, and a postilion blowing a horn. The following wording accompanied the marks: "Post papier te koop tot Amsterdam".

J. C. and A. van der Ley and J. Honig of Zaandyk had covers of reams of paper with pictures on them representing mounted postmen with letter pouch and horn. Both these firms made paper during the 18th and latter part of the 17th centuries with the horn watermark.

The above is Messrs. Van Gelder's wrapper mark for their Post paper.

The Hollanders were certainly quick to adapt themselves to changes of market requirements when they produced a crowned watermark for their King one year before his accession to the British throne. They varied the letters to suit Gulielmus or William, Anne and the Georges, but in some cases they put their own initials under the crown, or those of the consignees of their produce.

The above are some of the watermarks (reduced) of the firm of B. Cramer who have had mills in Holland since the year 1711.

## ALPHABETICAL LIST OF BRITISH PAPER-MAKERS AND MILLS

Dates are those on MS. or print. Date in bold type, thus: **1794**, signifies paper dated by watermark. P. M. A. — Paper Makers' Association of Great Britain.

## FRANCE

**T**here seems to be as much uncertainty concerning the origin of papermaking in France as in Italy. Some trace the origin to French Crusaders, who are said to have learnt the art while prisoners of the Saracens in Syria.

The water-wheel or Catherine wheel watermarks given below are symbolical of the Crusader legend. They are copies of Briquet's Nos. 13322/3, and the MSS. from which they were traced are dated 1469/72, nearly (13) two centuries after the last Crusade. Others, with more probability, trace

the beginnings to Spain, where the art was introduced by the Arabs in the middle of the 12th century. What is beyond doubt, however, is that trade in paper was carried on by the Lombards at the fairs held at Troyes from the beginning of the 14th century. For a time these travelling Italian merchants enjoyed an absolute monopoly, and took advantage of it to raise their prices. These became so excessive that the King of France granted letters

patent to the University of Paris in 1354, giving it the right to select four sworn paper-makers at Troyes and Essonne, in the province of Champagne, who should make fine paper for the use of the University, in return for which the manufacturers would be exempt from any kind of taxation.

- (15) The University continued to employ sworn paper-makers throughout the 17th and 18th centuries.

The following watermarks were used by sworn paper-makers. According to Briquet a mark like the one on the left was used by the Nivelles from 1511 to nearly the end of the 16th century.

Another watermark used by sworn paper-makers was a bell with the word JURÉ. The shape of the bell is like the coat-of-arms of the University of Paris reversed, the quatrefoil or rose of Troyes forming the clapper of the bell. The bell watermark was a French guarantee of fine quality and was eventually adopted in Holland and England, possibly for the same purpose.

- The vocabulary of the French paper-makers' industry is partly derived from the Italian. This circumstance and the fact that Colbert enticed Italian workmen to come to France is conclusive evidence that Italian industry had a great influence on the development of French paper industry.
- (27)

When the paper industry of France had reached the importance of that of Italy, it was found necessary to protect it, and to prevent other nations from recruiting French workmen with the object of discovering the secrets of the trade. In order to maintain the supremacy of France in the industry, Colbert took drastic measures to prevent the emigration of French subjects. A decree of 1667 rendered emigrants liable to imprisonment and confiscation of property. And in 1682 the death penalty was imposed. The persecution of the Huguenots that followed the revocation of the Edict of Nantes compelled many of the paper-makers and their workmen, who were protestants, to seek refuge in the neighbouring countries, namely: Genoa, Spain, Germany, Switzerland, Holland and England. From 1685 the French industry declined for a time, and that of the neighbouring countries named profited by the immigration of skilled

(27) French refugees.

A report to the Intendant of Auvergne stated that the art of paper-making in France flourished and made the greatest progress while left to itself during four centuries. During this time France supplied paper to several countries. The industry declined, however, in the middle of the 18th century in consequence of heavy taxation and vexatious regulations. On the other hand, the invention of the "Hollander" gave the Dutch a

(13) great advantage over their French rivals.

In this connection an incident is related that occurred to a paper-maker in Auvergne. The man had gone to the nearest village on business, and on coming out of the inn, after having refreshed himself heartily, tried in vain to mount his mule. He then dropped on his knees and begged the Patron Saint of the local paper-makers to help him, saying: "Buon San Damian, juda me", Good St. Damian, help me. With the assistance of the good saint he made another effort, and this time he vaulted clear over the animal's back, and fell heavily to the ground. The disappointed man only remarked that the saint had helped too much. So it is with States

(13) when they meddle with trade and industry, they do more harm than good.

The Law of 1688 regulating the manufacture of paper ordered that the initials of the surname and christian name of a paper-maker should be added to the watermark on every sheet of paper. Thus, Jean Villedary would have to add the letters IV on every sheet of paper made by him.

The Law of 1739/41 regulated the size and weight of all kinds of

paper according to their watermarks, and includes the arms of Amsterdam, Pro Patria, the 3 O's or 3 circles, and the arms of Genoa. It also mentions Spanish and Lombard types of paper. A regulation of 1739 is concerned with the export of paper to the Levant. The different sorts are named (9) three crescents or three moons (Venetian style). These regulations show that the French adopted well-known foreign marks for the export trade.

The tariff of 1741 that was attached to the Law of 1739 ordered that the year of manufacture must be shown in watermark, and that from the following 1st of January all paper should be marked 1742. The wording was not clear, and the result was that many papermakers marked their paper 1742 even until the end of the century. Accordingly French paper with 1742 in watermark is not always a guarantee that the paper was made in that year. For instance, an Ordinance that was printed in Amsterdam in 1768 concerning "Argent hachée" has the following watermark: Arms of Amsterdam, "J. Jardel fin Perigord 1742". The date 1742 in this case is of no use to confirm whether the Ordinance was an original or a reprint. But it is useful when prints purport to have been published earlier than the watermarked date. For example: "Antiquités d'Arles" is dated 1687, whereas the paper on which it is printed bears the watermark: "À Orange, Dauphiné, fin, 1742". Again, a History of England published at Amsterdam in 1730, bears the watermark: Arms of Amsterdam, "R. Jardel, fin, Perigord, 1742". Both these dates 1742 are clear evidence that the works described above are reprints.

From the 14th century onwards much of the paper used in England came from France, common watermarks being pot, hand and crown. In 1685 France exported paper to England, Spain, Switzerland, Denmark, Sweden, Russia and Holland. The twelve mills of Alsace exported 4000 bales, two (14) thirds of which went to Switzerland and Germany.

Fifty-six varieties of paper were made in France during the 18th century at the following centres:

**AUVERGNE** There were fifteen mills at Thiers and fifty at Ambert. Thiers was famous for superfine writing paper and Ambert for printing paper.

**ANGOUMOIS** produced the finest qualities, mostly for export via Bordeaux and La Rochelle. According to De Lalande there were 400 mills in this district in the 17th century.

PÉRIGORD	produced the finest qualities like the above.
LIMOGES	produced good qualities for printing and engraving.
GUYENNE	” ” ” ” ” ” ”
POITOU	” ” ” ” ” ” ”
BRITTANY	produced ordinary qualities.
NORMANDY	Wrapping and coloured paper.
MAINE	Paper with hand and pot watermarks.
ETAMPES	” ” ” ” ” ” ”
CHAMPAGNE	Strong ordinary paper for printing and writing.
DAUPHINÉ	Superfine qualities.
PROVENCE	” ”
(29) VIVARAIS	All kinds of fine paper at Annonay.

Shortly before the Revolution there were fifty mills near Morlaix in Brittany, which produced 109,000 reams per annum, of which 2700 reams were consumed locally, and the rest was exported to Portugal and Holland, to the former for wrapping fruit and to the latter for printing.

- (30) At one of these mills at Quimperlé, a paper-maker named Georget made stamped paper (*papier timbré*) which was used by State functionaries. The watermark represents an eagle with the words “Timbre Imperial” and the letter G. A specimen of the mark is given in this work under no. 546.

The paper mills of Brittany date from the 15th century. The industry was important at the beginning of the 17th century, and exported most of its produce to England via Morlaix. In 1729 the export to Holland, Spain and Portugal was reduced considerably in consequence of careless workmanship and dishonesty of the shippers. In 1756 the States of Brittany offered a reward for the best imitation of Dutch or Genoese paper. At this time Spain bought much paper from Holland and Genoa for re-export to their Possessions, and the French endeavoured to capture some

(30) of this important trade.

Examination of paper in the archives of a monastery at Santiago di Compostella, Spain, show that French paper found its way to Spain in the 18th century. Paper with the following marks has been found:

Arms of Amsterdam	“J. Jardel” 1734
same	“J. Dumas, Périgord” 1763/72
same	“R. Jardel, Périgord 1742”

same	“D. Perie, Périgord”
same	“F. Marot, Périgord 1742”
Arms of Holland	“J. Villedary, for Gilis van Hoven”
	“Malrusie, Périgord 1742”
	“C. E. Blanchard EN MARCHE 1742”
Arms of Amsterdam	<span style="border: 1px solid black; padding: 2px;">I ♥ S</span> 18th century.
Arms of Genoa	“R. Jardel, Périgord 1742”
same	“I. Abadie, Bearn 1762”
same	“D. P. Monie, Bicorre 1766”
Three circles	“M. Racuette, Bearn 1770”

In 1789 there were sixty mills in Auvergne, but in the year II of the Republic the number had dropped to thirty-three. One of the leading firms to cease work was that of the Richards, who had been established for more than two centuries. The last of this long line of paper-makers was riding to a neighbouring town on business and on the road met one of his former workmen, who asked for a lift. This was granted, but the workman stabbed his former employer and appropriated his horse and the contents of his pockets. Some of the last paper made by the murdered paper-maker exists in the French edition of Capt. Cook's voyages published in 1785. The watermark reads: “FIN DE T  RICHARD, AUVERGNE” which signifies not only

(13) fine paper manufactured by T. Richard, but the tragic end of a famous and old-established firm.

The first treatise that was published in France on the art of paper-making was written by Father Imberdis in 1693. The writer was a Jesuit and native of Ambert in Auvergne, who lived among paper mills, and from his detailed description was quite familiar with the industry. After giving a most minute description of all the processes, he adds, as if afraid to have said too much, that what he has said is no secret in Holland or England, and that paper is far from perfect when it is released from the mould, but requires a thousand manipulations, and must pass through numerous hands before it becomes the finished article. Heaven, he says, does not allow a divine art to be made easy for mortals here below.

The writer gave two hints how to test writing paper. The first is to see how it reacts when being crumpled in the hands, and if the crumpling sounds like that of parchment, as it should when satisfactory. The second is to wet a piece of paper with the tongue, and if the saliva penetrates to any part of it, it will not be fit for manuscript.

- Father Imberdis ends his descriptive poem by saying that if one requires further particulars one should come to Ambert, where 300 mills exist in the neighbourhood. Being an Auvergnat — a folk given to  
(31) exaggeration — one need not accept this number as absolutely correct.

The virtue of the paper industry has been extolled in various languages, and the following are some examples: —

At the end of Bartholomaeus' "De Proprietatibus Rerum" an epilogue in 13 stanzas has been added, and the following stanza refers to the paper industry:

"And also of your charyte call to remembrance  
The soul of William Caxton, first pryter of this boke  
In laten tongue at Coleyn hyself to avauce  
That every well disposed man may thereon loke  
And John Tate the yonger, Joye mote he broke,  
Wich late hath in England doo make this paper thinne  
That now in our English this boke is printed inne".

(Printed at Westminster by Wynkyn de Worde, 1496)

In the second part of Henry VI, Act IV, vii, Shakespeare makes Jack Cade, the rebel communist, accuse Lord Say of building a paper mill.

"A description and playne Discourse of Paper, setting foorth in verse a Paper-Myll built near Dartford, by a High Germaine, called Master Spilman, Jeweller to the Queenes Majesty, by Thomas Churchyard, 1588."

Extracts (modernized):

I praise the man that first did Paper make,  
The only thing that sets all virtues forth:  
It shows new books, and keeps old works awake,  
Much more of price than all the world is worth:

If paper be so precious and so pure,  
So fit for man and serves so many ways,  
So good for use, and will so well endure,  
So rare a thing, and is so much in praise:  
Then he that made for us a Paper-mill,  
Is worthy well of love and world's good-will.  
And though his name be Spil-man by degree,  
Yet Help-man, now, he shall be called by me".

## Der Papyrer.

Ich brauch Hadern zu meiner Mül  
Dran treibt mirs Rad des wassers viel/  
Daß mir die zschneitn Hadern nelt/  
Das zeug wirt in wasser einquelt/  
Drauß mach ich Pogn/auff dē filz bring/  
Durch preß das wasser darauß zwing.  
Denn henck ichs auff/laß drucken wern/  
Schneweiß vnd glatt / so hat mans gern.

### THE PAPER-MAKER

The water turns my mill wheel round,  
Where rags to paper pulp are ground:  
Their snowy leaves on felt I lay,  
And squeeze the water well away,  
And then I hang my sheets to dry:  
All white, and shining like the sky.

Lines by the Meistersinger, Hans Sachs, about 1550. Engraving by Jost Amman.

*Vat af gesleeten linnendoeken,  
Hier op te kooppen, daar te zoeken:  
Gewaschon en tot pap gebragt;  
Verschijnt papier, zoo waard geacht.*

### THE PAPER-MAKER

White linen that is torn to rags,  
Bought up and carried here in bags,  
Is washed and then to pulp is made,  
Then changed to paper of high grade.

Etching by Jan Luyken, published at Haarlem, 1695.

“Le sage écrit sur parchemin,  
Sur coquille l’amant griffonne;  
L’excellence use du vélin,  
Et les rois ont pris la couronne,  
Sur tellière on lance un plan,  
Lise, pour tracer quelques lignes,  
Achète du petit poulet.”

Lines by Louis Festeau, in “Papeterie et Papetiers de l’ancien temps”.

The following words used to be sung by contented companions at their work in a paper mill in the 18th century and was brought to light by Henri Pourrat in his delightful book, “Dans l’herbe des trois vallées”:

“Si le roi savait  
La vie que nous menons  
Quitterait son palais,  
Se ferait compagnon.”

Of the virtue that springs from foul rags Voltaire said: —

“Un ramas de guenilles et de sales chiffons  
Éternisent l’esprit des Plynés et d’un Buffon.”
